

GPI Board (REST API)

[Module description](#) **REST API**

Query to retrieve the latest GPI event, returns an XML-document.

```
GET http://<IP_ADDR>:7901/gpi?module_id=<N>
```

Parameter description:

- **GET** - HTTP GET query.
- **<IP_ADDR>** - server IP address.
- **module_id** - GPI Board service sequence number (starts with 1).

Example of a query to the server:

```
http://localhost:7901/gpi?module_id=2
```

Example of the server response to GPI Board System/HotKey:

| [response_gpi.xml](#)

```
<GPI ReceivedTime="2018-03-28T14:00:42.904">  
  <Attr name="last_key">Alt+F1</Attr>  
</GPI>
```
