

Prompter (Hotkeys)

Hotkey combinations of [web application Prompter](#).

Story Navigation

Hotkeys	Description
Shift + Home	Go to the text of the current story.
Ctrl + B	Set the current story mark for the story displayed on the screen.
Shift + PageDown	Go to the text of the next story.
Shift + PageUp	Go to the previous story.
Ctrl + n Ctrl + nn	Go to the story by its sequence number. The sequence number is determined by the position of the text block in the loaded Running Order, the position of the item in the playlist of the Program module, or the position in the text file (the position may be different from the story's sequence number in the running order). Press and hold Ctrl, type a one- or two-character story number, and then release Ctrl. For example: CTRL + 5 or Ctrl + 21.

Text Navigation

Hotkeys	Description
Home	Go to the beginning of the text of the selected story
End	Go to the end of the text of the selected story
Alt + PageUp	Go to the previous marker in the story text. The sequence "===" is used as a marker.
Alt + PageDown	Go to the next marker in the story text. The sequence "===" is used as a marker.
PageUp	Go to the previous page in the story text (page up).
PageDown	Go to the next page in the story text (page-by-page preview).
Mouse wheel	Fast scroll through the text in viewing mode.
Shift + 1	Toggle the text display in the presenter's prompter mode. The font size in this mode is set by the Prompter font size option. Usually the larger size is used.
Shift + 2	Enable text display in the view mode. The font size in this mode is set by the Review font size option. Usually the reduced size is used.

Text Editing

Hotkeys	Description
Ctrl + E	Enable text editing mode. Supported in File and Program modes.
CTRL + S	End editing and save changes. In Program mode, the changes will be saved to the executable playlist. In File mode, the changes will be saved for display, but the file will not be overwritten.
Ctrl + Z	Complete editing without saving changes.

Scrolling text on air

Hotkeys	Description
Space	Starts and stops automatic text scrolling.
↑	Increases the text scrolling speed.
↓	Decreases the text scrolling speed.
←	Sets the text scroll direction from top to bottom.
→	Sets the text scroll direction from bottom to top.

Settings
