2.11.26 (23.04.2025)

- The "Base Line"='Default' setting in the Teletext subtitle encoder has been fixed.
- The application of export codec parameters in "Export Audio" has been fixed in NewsCut.
- The problem with files with a frame rate different from the project frame rate has been fixed in NewsCut.
- In NewsCut, when loading a clip via "Open Clip", the previously used folder is now opened.
- The MSI installer now creates launch associations for NewsCut for NCP and SLC files. Also, you can enable and disable associations by running `newscut --install` and `newscut --uninstall`.
